Farm to Early Care and Education

Research shows Farm and School initiatives improve children's health and nutrition. Most of these programs start in K-12 school districts, but we can reach children earlier with Farm to Early Care and Education.

Farm to Early Care and Education activities have been shown to:

Increase

Fruit and vegetable consumption, some of which may increase vitamin A, C, and E intake

Healthy food consumption at home

Willingness to try new foods

Motor skills

Life skills, social skills, and self-esteem

Physical activity

Decrease

Diet-related diseases among children Screen time

Consumption of unhealthy foods and sodas

Strategies that Work

Parent education and engagement

Meal planning and preparation

Curriculum where kids touch and taste food

Gardening with children

Fruit and vegetable boxes

Agriculture and Georgia's Economy

Farm to ECE can have a significant positive impact on the state's economy.

Agriculture is the #1 industry in Georgia.

That's approximately

\$73.3 BILLION

contributed to the state's economy.

In 2017, there were **392,400** agriculture jobs in Georgia.

That's 1 in 7 Georgians.

9.95 million acres in Georgia.

That's **25%** of all the land in Georgia.
