16. Letter to School Food Authority-(Attachment I) - Annual Requirement for Vended Sponsors only)

Sponsors other than School Food Authorities (SFA) that plan to contract with a separate company to purchase complete unitized meals or prepared/cooked food items must first seek meals from the local school before searching for a food service management company. A copy of the letter written to notify the SFA of the sponsoring organization's intent to vend meals must be submitted to DECAL with the application for approval (reference Attachment I or the Procurement Manual).

The SFA may then express an interest to provide meals for this sponsor, and execute a contract or agreement to furnish food items. The sponsor is not required to accept the terms offered by the SFA.

If a mutual agreement is reached, a contract may be entered into between the sponsoring organization and the school food authority. If a mutual agreement is not reached, the sponsor may begin the procurement process to enter into a contract with a food service management company. Once the procurement process begins, the SFA may not enter a bid in competition with the FSMC.

Sponsors are only required to submit a revised menu and seek approval when there is a significant change to the menu, e.g., due to lack of availability of food items listed in the menu, change in vendor/FSMC, or other unforeseen circumstances. Sponsors are ultimately responsible for ensuring that only creditable food items/components are served and only creditable meals/snacks are claimed for reimbursement. When required, revisions to approved menus must be**

submitted using the SFSP Menu Form via email to the assigned Business Operations Specialist. Sponsors are required to notify Bright from the Start when revisions to menus are necessary. Refer to SFSP Update Procedures for more information.

All menus must identify all meal components by name and all components must be consistent with requirements detailed in 7 CFR 225.16 (d). Generally, sponsors develop cycle menus that can be used repeatedly throughout the summer months. A cycle menu lists meals for a predetermined number of days (e.g. 5, 10, and 11) and is repeated at the end of the cycle. The following guidelines must be followed when planning SFSP meals.

- **Substitutions**—Substitutions of fruits and juices may be made to menus without prior approval from Bright from the Start, as long as the substitution is not inconsistent with meal pattern requirements. Sponsors must ensure that the substitutions do not result in serving a meal with the same food in different forms (e.g. orange and orange juice or apple and applesauce). Also, avoid serving the same items on consecutive days.
- **Dietary Guidelines**—Food purchased for use in the SFSP must meet healthy dietary guidelines. Meats need to be low in fat and/or low in salt. Cereals are required to contain a minimum amount of sugar. Using 100% whole wheat or partial whole wheat breads can only increase the amount of fiber in a meal.
- **Menu Items**—Fresh fruits and vegetables high in Vitamin A and Vitamin C need to be served several times a week. Fruit juice served in the SFSP must be 100% fruit juice. Different types of milk must be served on different days. Skim, 1%, 2%, whole, or chocolate milk may be served with SFSP meals. Low fat or skim milk is recommended to reduce the fat content of the meal. Children may enjoy one percent fat chocolate milk as a good alternative to plain milk.
- **Hot vs. Cold**—Hot items can be served at sites away from the food preparation site as long as hot items are kept at the proper temperature during transportation and through the time of meal service. The health department must be notified of your intent to transport hot or cold meals. The Health Department Notification Letter is included on the SFSP Flash Drive.
- **Examples:** Sample menu items for both hot and cold meals are included as Attachment F on the SFSP Flash Drive. A food specifications list is also included as Attachment K to assist in the selection of the appropriate types and quantities of foods to be listed on the menu submitted to Bright from the Start for approval.

Part B-Required Documents for Camps, NYSP and Upward Bound-submit to Bright from the Start:

1. Camp Household Application including letter for parents (*Submit to Bright from the Start for approval only if Bright from the Start template form is not used*)

Organizations sponsoring campsites, NYSPs, or upward bound programs are required to annually collect income eligibility forms for each child receiving SFSP meals. A SFSP Eligibility Form (or approved alternate form) must be sent home with each child to be completed by parent(s) or household guardians. The sponsor must also send a letter home with the form explaining how to complete the form and how the form will be used. This letter must include the nondiscrimination statement to reassure parents that the information submitted on the form will not be used to discriminate against any child. A copy of the letter sent to parents to accompany the eligibility form must be submitted to Bright from the Start with the submitted application for approval. Organizations sponsoring campsites can only claim meals served to those children who qualify for free or reduced meals based on the income eligibility forms.

The purpose of the SFSP Eligibility Form for closed enrolled sites is to determine a child's eligibility for free or reduced meals in the SFSP. This form is used when a site cannot be qualified based on school data, census data, housing authority data, or any other acceptable form of community based data. The eligibility

form is to be completed by a parent or household guardian of the participating child and returned to the sponsor. The sponsor must evaluate the information given on the form to determine a child's eligibility for free or reduced meals in the program. If at least 50% of the enrolled participants qualify for free or reduced meals, then 100% of the meals served are eligible for reimbursement. Organizations sponsoring an enrolled site that does not qualify as a camp (camps can serve more than two meals or keep children overnight) may claim meals served to all children, regardless of whether they qualify for free meals.

A sample SFSP Eligibility Form for Camps and Enrolled Sites is included as Attachment 10 of this booklet. If the organization chooses to use a form different from the sample provided, a copy of the form must be submitted to Bright from the Start with the application package for approval. If the organization chooses to use the authorized form (-Attachment 10), it is **not** necessary to send a copy of the form to Bright from the Start. If you have any questions concerning how to complete and/or classify form, please call Bright from the Start.

- **Income eligibility forms must be collected annually for all participants enrolled in the camp, NYSP, upward bound or closed-enrolled site.**

2. NYSP Brochure (must include non-discrimination statement)

Organizations sponsoring National Youth Sports Program (NYSP) and/or Upward Bound Programs are required to submit a copy of any promotional brochures used to promote their programs to Bright from the Start with the submitted application for approval. The contract/agreement is a binding agreement between the sponsor and the SFA or FSMC for the preparation and delivery of **unitized** meals for the SFSP. All required information must be included in this document. At a minimum, the contract/agreement must include the number of anticipated meal/snacks for the program, the length of program operations and the price per unit for those meals. Any required transportation arrangements must also be included in this document. See Addendum C in the Procurement Manual.

3. Public Release Announcement Seeking Unitized Meal/Snacks

Sponsoring organizations are required to use a formal procurement process to award contracts to a FSMC when **total estimated costs meet or exceed \$150,000**. Sponsors can only choose this option after

requesting meal service from the local SFA. The public announcement of accepting bids for unitized meal/snacks must be issued to local media. The announcement must include the nondiscrimination statement, the name of media organization to which the public release was sent, and the date the publication of the release was requested.

4. Budget Detail

Annual Budgets are required for all Sponsors, except School Food Authorities with submission and approval of waiver.

The FNS Instruction 796-4 Rev. 4 is one of the elements that must be used by the State Agency to establish the financial management system required by Program Regulations. The use of FNS Instruction 796-4 Rev. 4 is incorporated as part of Bright from the Start's financial management system and must be followed unless Bright from the Start has set more restrictive or specific guidance via this manual, policies or policy memorandums. Financial management includes, but may not be limited to, budgeting, costing standards, internal control, management of revenues and expenses, management of property, procurement standards, and fiscal audits. This guidance further clarifies the standards that Bright from the Start expects Summer Food Service Program (SFSP) Sponsors to meet in order to comply with the budget submission and approval process, allocation of costs, and charge of program expenditures. This guidance is not all encompassing, but is intended to address those specific situations that sponsors typically find confusing or difficult. If you are unsure of the steps to take for specific situations not addressed in this budget guidance or the FNS Instruction 796-4 Rev. 4, contact the office for technical assistance.

Budget Submission

The budget is a section within the electronic application in GA ATLAS, and is developed based on actual prior year expenses, plus or minus projected increases or decreases in costs. The revenue to cover allowable program expenditures include, sponsor resources/cash reserves, SFSP carry over funds or beginning balances, and the total projected income (experienced sponsors), or total projected income and projected maximum number of meals the sponsor plans to serve at all sites (new sponsors). As part of the budget section, GA ATLAS will indicate the projected maximum budget amount based on the projected maximum number of meal/snacks to be served at all sites. Sponsors are prohibited from submitting a budget in excess of the projected maximum budget amount. The budget is a combined budget and will collect total annual costs per cost category. The SFSP portion of those cost will be calculated based on the percentage entered and allocated to the SFSP. **ALL NONE SFSP COSTS, MUST BE REPRESENTED BY THE REMAINING PERCENTAGE, IN THE OTHER COSTS COLUMN.** (Total Cost /100% - SFSP % = Remaining %)

Sponsors will assume full administrative responsibility for properly calculating allocation rates, documenting the basis of allocation, and maintaining records that support allowable SFSP costs. **No organization will be approved to operate the SFSP without an approved budget. School food authorities that have an approved waiver are exempt.**

All allowable SFSP costs that are incurred in the operation/administration of the SFSP must be included in the annual SFSP budget. All costs must be authorized and approved via the SFSP budget prior to sponsors using SFSP reimbursement to pay for allowable SFSP costs. Failure to include a cost in the annual budget may result in the cost being determined unallowable. SFSP reimbursement used for unallowable costs must be repaid to the organization's non-profit food service account. Please refer to policy memorandum entitled "*Costs Disallowance in the Summer Food Service Program*" for more information.

Disclosure of less than arm's length transactions must be disclosed when such relationship exist between related parties. The **Related Party Disclosure Form**

<http://dec.al.ga.gov/documents/attachments/RelatedPartyDisclosureForm.docx>

must be used for disclosure. A related party is a person, place, or thing related to or closely held by another person, place, or thing. A transaction between the two is a less than arm's length transaction. Federal regulations require that related party transactions be disclosed when federal funds are planned for the execution of such transactions. Failure to disclose these relationships inhibits the State agency's ability to make informed decisions regarding the allowability of the costs. Failure to disclose will result in the disallowance of the cost and may subject the institution, its principals, employees, consultants or others to the administrative and legal remedies available to the State agency and FNS.

The following steps can be used to assist you in creating your budget:

Determine the estimated amount of income from each source, including the estimated meal reimbursements that you will receive from the Summer Food Service Program.

Projected Meal Reimbursements

For experienced sponsors, we recommend that you use the amount of SFSP meals reimbursement received last year to estimate the amount that will be received in the new fiscal year. The amount may be adjusted if the number of sites will increase or decrease, however, supporting documentation will be required to document any changes.

For new sponsors, we recommend that you used the available resources from the sites to determine the estimated number of meals the sponsors plans to serve at all sites.

Other Revenue

- Reimbursements that were earned in prior years that were not expenses (This balance most likely will be reflected as the ending balance in the food service account after the fiscal year has been properly closed.)
- Funds deposited in the food service account due to reviews finding(s) or Agreed Upon Procedures finding(s).
- Other program income (see the definition below for program income).
- Other income (see the definition below for other income).

Program Income means gross income earned from operating the Summer Food Service Program. All income to SFSP must be retained and used only in the institution's program food service. Other incomes include cash donations that are specifically identified for use in the sponsor's SFSP.

Define the cost to operate the Summer Food Service Program by making a list of all the expenditure items your institution needs to operate the SFSP. These costs are those that are paid with both SFSP reimbursement and other funding resources.

An estimate of expenses can be used when actual costs cannot be obtained. It is helpful to look at items of expenditure as **Fixed, Variable, Operating or Administrative, Direct or Indirect**. The sponsors should be aware of cost in each category so that action can be taken to improve the meal service and other aspects of the SFSP program if it is determine that the operating costs are less than the anticipated meal reimbursements.

- *Fixed expense* items are likely to remain the same throughout the year i.e.-rent.
- *Variable expense* items are likely to change depending on levels of activity.
- The *operating costs* represent any allowable expenses incurred by an institution in serving meals to participants under SFSP and allowed by Bright from the Start’s financial management instructions.
- The *administrative costs* represent any allowable expenses incurred by an institution in planning, organizing and managing SFSP and allowed by Bright from the Start financial management instruction.
- *Direct costs* are costs that can be identified directly to a program and/or funding source and must be charged directly to the program. Direct costs which are insignificant in dollar amount may be treated as an indirect cost if the institution is consistent in this application to all cost objectives. Examples of allowable direct costs used in SFSP include:
 1. Operating and administrative nonprofit food service employee salaries
 2. Depreciation or use allowances on equipment used in the nonprofit food service program
 3. Food purchased for use in the nonprofit food service program
- *Indirect costs* are costs that have been incurred for common or joint objective and cannot be practically identified to the food service program, SFSP, or other institution’s program. Examples of allowable indirect costs used in SFSP include:
 1. The allocated expenses of the institutions’ buildings, capital improvement to land/building and equipments used for common purposes are examples of indirect costs for depreciation and use allowance.
 2. Operating and maintenance indirect costs are the expenses that have been incurred for the administrative, operation, maintenance, preservation, and protection of the institution physical plant.
 3. General and administrative indirect costs are the expenses that have been incurred for the overall general executive and the administrative of the institution.

Prior Approval

Prior Approval items are those expenses that must be specifically identified by item and amount during the budget process. Including the item as part of a larger entry on a line item in the budget without identifying the specific cost item and amount is not sufficient and will not meet the requirement for sufficient disclosure. When these cost items and amounts are properly disclosed, approval of the budget meets the requirement for prior approval unless the State agency specifically disallows the cost in writing.

Sponsors are required to submit documentation to support certain costs with the annual application. Failure to submit required documentation to support costs in the budget will result in the denial of the budget, in whole or in part. Sponsors are prohibited from using SFSP reimbursement for denied costs.

Documentation

All documents required for budget submission must be retained according to the Recordkeeping Requirements Policy SFSP/03-5, and be available upon request for desk review/review. Documentation supporting the

calculation/derivative of ALL projected costs, and the method for allocating costs must be maintained and available upon request, as well.

Allocation

Cost must be allocated to isolate SFSP cost from all other Child Nutrition Program or non-program activities. The sponsor must ensure records are maintained to document and support the allocation rates applied to annual costs. Resources are available to assist with calculating allocation rates. However, a sound understanding of organizational costs and how each Program or Activity benefits from costs, is essential to properly allocating costs and ensuring that meal reimbursement are only used to cover allowable SFSP related costs. See the following links for the Financial Allocation Method tip sheet and an Allocation Tool Worksheet.

<http://dec.al.ga.gov/documents/attachments/AllocationMethods.doc>

<https://www.cnp2000.dec.al.ga.gov/forms/files/AllocationCalculationtool.xlsx>

Calculate – Sponsors must ensure that cost are properly calculated. Sponsors are solely responsible for the result of all calculations that effect the allocation rate/percentages, and costs, that are requested and submitted for approval, in the Program budget. Please note, the SA allows 4-6 weeks of time for pre/posting planning, when the time is necessary and reasonable for efficient program administration. Only allowable labor costs are eligible to be paid with the SFSP meal reimbursement. All rules for all cost categories must be followed and considered, when using Program funds for costs.

Budget Amendments

When the budget is initially approved for the fiscal year, it is considered the original budget. The original budget (approved or denied budget line items) can be viewed via GA ATLAS. Amendments to the budget are allowed throughout the summer meal service operating period. Sponsors are prohibited from submitting a budget amendment after the summer operation has ended. Therefore, sponsors are encouraged to be fiscally responsible, by monitoring all financial activity, actual costs, and the approved budget.

Budget amendments that include new costs (costs not previously approved in the original budget) must be submitted within 24 hours of incurring the new cost, unless the new cost meets or exceeds \$150,000. In this case, the cost cannot be incurred unless appropriate procurement procedures have been followed.

Budget amendments that include a 25% increase or decrease in category or line item approved costs (costs previously approved in the original budget), must be submitted within three (3) days of the increase; except when the increase in approved cost is incurred through the formal procurement process. In this case, the cost cannot be incurred unless appropriate procurement procedures have been followed.

Failure to submit budget amendments within the required timeframe will result in the disallowance of costs. Refer to Bright from the Start's policy memorandum entitled, "Costs Disallowance in the Summer Food Service Program".

SFSP reimbursement can only be used to pay for allowable SFSP costs that are approved in the budget. Use of SFSP reimbursement on unallowable costs will result in the disallowance of the costs, and sponsors will be required to repay funds used on unallowable costs to their non-profit food service account.

Budget Amendments and Determining Estimated Revenue

The projected revenue for the budget amendment will be the year-to-date reimbursements plus the estimated projected income for the remaining months of the fiscal year.

Budget Amendments and Determining Estimated Expenditures

The projected expenditures for the budget amendment will be the year-to -date expenditures plus any projected increase in allowable cost for the remaining months of the fiscal year. Sponsors are required to complete the Sponsor Update Form (Attachment Q, page 2), and notify Bright from the Start of all budget amendment submissions via email at Jacqueline.Marchant-Boshears@dec.al.ga.gov and carbon copy (cc) Shonda.Franklin@dec.al.ga.gov.

Sponsors are required to submit a budget amendment when the following occurs:

- When a new cost is incurred and not previously approved in the original budget;
- When the sponsor exceeds the current approved amount by 25% or more, by cost category for projected costs;
- When allocation methodologies change due to changes within the organization, and
- When there is a 25% increase or decrease in the number of sites sponsored by the organization.

Below is a detailed description of each SFSP budget line item and the minimum document requirements for the cost category. Sponsors are required to maintain all documents to support the use of SFSP reimbursement to pay for the costs. Failure to maintain the required documentation will result in the costs being determined unallowable. SFSP reimbursement used on unallowable costs must be repaid to the organization's non-profit food service account.

BUDGET LINE ITEM CATEGORIES:

B1. PRE-AWARD COST

Pre-Award Costs: are costs incurred prior to the effective dates of the award (approval to participate in the SFSP) directly pursuant to the negotiation and in anticipation of the award where such costs are necessary to comply with the proposed delivery schedule or period of performance. Such costs are allowable only to the extent that they would have been allowable if incurred after the date of the award and only with written approval of the awarding agency. Cost more than 90 calendar days pre-award require approval of the Federal awarding agency. Ensure those cost are included. Refer to 2 CFR Part 200 Subpart E for more information on general costs principles for federal reimbursement programs.

Sponsors that have excess funds from the prior year and have SFSP-related costs that would be incurred prior to the submission and approval of the application can use the funds on allowable costs. Sponsors must indicate the costs in this line item and submit documentation to support the cost(s). **Sponsors that submit requests prior to receiving access to the complete the application are still required to enter the information in the budget.**

Sponsors are prohibited from separating goods/services into single, sole-source agreement/contracts to preclude the competitive bid process, i.e., purchasing items separately to prevent total costs from meeting or exceeding \$150,000.00. Micro-purchases as defined in 2 CFR Part 200 §200.67 may be awarded without soliciting competitive quotations. Micro-purchases are purchases of supplies and services, the aggregate amount of which does not exceed \$3,500.00. Please refer to Bright from the Start's Procurement Manual for guidance on the micro-purchase and small purchase requirements, and the competitive bid process.

Costs that are related to kitchen space used for meal preparation/set-up, dining, utilities associated with meal preparation/delivery or set-up, office space and related office space utilities. Depending on the specific situation for which space is being occupied or leased, different requirements apply. Sponsors are allowed to use SFSP reimbursement for kitchen/dining or office space rental costs, and utility costs in the kitchen/office space, if not included as part of the total rental amount.

Charges billed to the sponsor for the opening, closing, and use of the school facilities, including the use of space for dining only, are allowable operating costs when school facilities are used. See 7 CFR Part 210.2 for the USDA's definition of school.

Fees associated with health and safety inspections, should be recorded in this budget category.

Allocation of Costs-Rental Space (Kitchen or Office)

When renting or leasing kitchen or office space in whole or in part, sponsors must ensure that SFSP reimbursement is used to pay costs related to Program use. When the rented space (from an unrelated party) is part of a larger space, Sponsors must use and submit an appropriate allocation methodology.

Any generally accepted method of computing depreciation may be used as long as the method results in equitable charges considering the useful life of items and the benefits received by the program. The depreciation method used for the program should be consistent with the method used by the institution for its other federally sponsored and nonfederal sponsored activities.

Documentation Requirements: All documents listed below must be submitted with the application for review and approval.

Documentation Requirements: documents including, but not limited to those listed below must be maintained on file and made available for review.

B5. LABOR AND BENEFITS COSTS

Per FNS Instruction 796-4 Rev. 4, “Labor operating costs are allowable when the amounts claimed are based upon hourly rates that are reasonable for the services provided and documented by payroll records. Hourly rates will be considered reasonable to the extent that they are consistent with rates paid for similar work in the area in which the sponsor is located. The cost of program labor may include the documented amounts of wages and fringe benefits, including Social Security withholding tax and retirement benefits paid or incurred during the reporting period. The costs associated with personnel who work only a portion of their time for the SFSP must be prorated based on the hours worked for the program.”

Sponsors are required to maintain Time Reports for Administrative SFSP Staff (Attachment 25) and Dual Administrative and Operating Staff (Attachment P). These forms must be completed monthly and signed by the position/employee’s supervisor. Annual costs must be allocated according to administrative, operation and/or other duties. Cost included in the budget for staff, should be consistent with staff listed in the Management Plan, Authorized Signers section, and Program Operation section.

Documentation Requirements: All documents listed below must be submitted with the application for review and approval.

- Payroll records, i.e. canceled checks, documents supporting payment of payroll taxes, bank statements, etc.
- Documentation to support the calculation of projected cost, and allocated percentage rate, if less than 100%

Allocation of Labor Costs

In order to establish the portion of costs that may be claimed as program labor, the Time Report (*Attachment P*) or another valid record must document the amount of time spent by each person on SFSP duties. Although employees may perform multiple job functions, there can only be one wage. The wage must be for the employee's total work performance; further prorated (using an appropriate allocation methodology) based on the amount of time spent performing SFSP job duties. Because sponsoring organizations operate year round activities, an established compensation plan with identified wage ranges should be in place and referenced when including labor costs in the SFSP budget. Organizations that will use SFSP funds for labor costs for shared positions, i.e. Executive Directors, Program Managers/Administrators, Monitors, Clerical Staff, Accounting or Bookkeeping Staff, must ensure that the employee's total salary is prorated, and only hours worked performing SFSP duties are paid with SFSP reimbursement. Please note, the SA allows 4-6 weeks of time for pre/posting planning, when the time is necessary and reasonable for efficient program administration.

Allowable Wage Amounts for SFSP Positions

Salary and wages for operating and administering the SFSP must be consistent with rates paid for similar work and consistent with the amounts reported by the U.S. Department of Labor or State Labor Department for that field of employment, in the same or comparable geographic location.

Sponsors with staff that performs duties with multiple Child Nutrition Programs (CACFP, NLSP, or SFSP) or staff that perform other duties within the organization, can only allocate a percentage of the staff's total salary to SFSP. For example, if the same monitor is used for CACFP and SFSP, then the monitor's total salary must be reported in the budget, and only a percentage that the total salary can be allocated to SFSP.

B6. CONTRACTED LABOR COSTS

Cost for 1099 contract labor is record in this category. Operating and administrative labor must be necessary and reasonable for proper administration of the Program. Rates of pay must be allocated appropriately based on Program and non-Program duties. Ensure that administrative contractors are not utilized for management responsibilities. See Policy No.:SFSP/09-17. Rates of pay must be consistent with the company compensation plan and with Federal Department of Labor Statistics for similar positions.

A sponsor can be permitted to charge the program, equipment cost as a direct cost, depreciation or use allowance.

In that the out right purchase of capital equipment in NOT permitted in the SFSP, (FNS Instruction 796-4 Rev. 4 X A4a & E2bc), cost directly expensed would be via rental expenses.

Depreciation and use allowances are means of allocating the cost of fixed assets to periods benefiting from asset use. The depreciation method used for the program should be consistent with the method used by the institution for its other federal sponsored and nonfederal sponsored activities. A physical inventory is required, at least once every two years for items funded with federal monies. All equipment over \$5,000 purchased, depreciated, or claimed use allowance should be documented on the Equipment & Depreciation Record form.

Allocation of Costs-Utility/Maintenance/Janitorial Costs (Kitchen or Office)

When incurring renting Utility/Maintenance/Janitorial Costs in a kitchen or office space, sponsors must ensure that SFSP reimbursement is used to pay costs related to Program use. Sponsors must use and submit an appropriate allocation methodology.

Any logical method of allocating costs may be used as long as the method results in equitable charges considering and is consistent with the method used by the institution for its other federally sponsored and nonfederal sponsored activities, and aligned with the derivative of the costs.

Documentation Requirements: All documents listed below must be submitted with the application for review and approval.
