

Supporting Onsite Learning for Virtual Education Program

Georgia's Virtual-Only School Systems

Overview

The Georgia Department of Education reports that the following public school districts and state charter commission schools are primarily offering virtual learning (50% or more of classroom instruction is virtual for any grade level kindergarten-7th). Families whose students attend these public school districts or locally approved charter schools within these public school districts will meet the school district eligibility requirement for a SOLVE scholarship. Eligible Georgia state charter commission schools are listed on the next page. Additional information on the eligibility requirements for a SOLVE scholarship [is available here](#).

DECAL will update the list of primarily virtual school systems as we receive updates from the Georgia Department of Education. This document was last updated on **June 14, 2021**.

Eligible School Districts

No eligible school districts.

Eligible State Charter Commission Schools

No eligible state charter commission schools.
