

Home Visiting Services Has a Positive Impact on Social and Emotional Health

Emory researchers conducted a survey to understand the impact of the Georgia Home Visiting Programs on social and emotional health

- 250 caregivers participated
- Caregivers enrolled in the evidence based programs Parents as Teachers or Healthy Families Georgia

Social and emotional health in early childhood is correlated with:

- mental health wellbeing in adolescence & adulthood
- increased academic and career success
- decrease in emotional and behavioral problems

Caregiver Satisfaction with Addressing Socio-emotional Development

Emotional Development

Social Development

"Home visiting has allowed me to gain an opportunity to view different methods of how to improve my child's learning ability and mine as well" - Mother of 5 year old in the Healthy Families Georgia program

Behavioral & Knowledge Improvement

Over 90% of caregivers reported improvements in...

- Ability to help child learn new things
- Knowledge of resources to improve child social development
- Positive interactions with child
- Knowledge of activities to improve child social and emotional development
- Willingness to engage in discussion about child's social and emotional development
- Parenting Skills
- Parenting with Empathy
- Child's ability to self-regulate emotions and behaviors

Caregiver Satisfaction with Home Visitors

My home visitor and I discuss parenting and my child's development

My child and I participate in all the parent-child home visiting activities

My home visitor gives me ideas on how to interact with my child

There are no language barriers with my home visitor

My home visitor gives helpful feedback for my child's development
