

# HANDWASHING STEPS

---

01

Wet your hands before applying liquid soap.

02

Rub soap all over your palms, the backs of your hands, and in between your fingers **outside the water stream.**

03

Do this process for at least **20 seconds** before rinsing. That's about as long as it takes to sing two children's songs.

04

Dry your hands with a paper towel and discard in a hands free trash can.
