Preschool Inclusion Self-Checklist

In addition to the three defining features of inclusion (access, participation, and supports) outlined in the Division for Early Childhood/National Association for the Education of Young Children joint position statement on inclusion, research has identified several effective components of quality inclusion. This self-assessment uses these empirically supported qualities of effective preschool inclusive programs. The preschool inclusion team can use this tool to track changes over time. Use a new column for each date of administration, and score how you think your program is doing in terms of its consistent, quality implementation of the inclusion component. If your program is just starting to implement preschool inclusion, expect low scores—that is okay! By completing this evaluation, you are on the road to improvement. Your scores should help you identify your specific strengths and needs, which can be used to plan your next steps. By completing this self-assessment regularly, you will be able to track your program's progress and make necessary adjustments to your plan. Good luck, and remember to enjoy the exciting and rewarding adventure you are about to embark on!

Use this key to score your program:

1	2	3		
Not Implemented	Sometimes/ Occasionally Implemented	Fully/Consistently Implemented		
			Date:	
		ltem		
Interactions	 Teachers/staff provide intentional, sufficient, and supported interactions between peers with and without disabilities. There are a sufficient number of peer models. 			
	3. Teachers/stat			
Specialized	and routines	when necessary for i		
Supports	instructional	trials to children to a	number of embedded ddress the complete learning lization, and maintenance).	
Families	involvement	•	encouragement of family articipation in the assessment, esses for children.	
Inclusive Services	tem (includir	ng families) are includ team when develop	ach child's service delivery sys- led as members of the child's ing and discussing goals and
